#1.1 Implement a recursive function to calculate the factorial of a given number.

```
def fact_rec(n):
    if n==0 or n==1:
        return 1
    else:
        return n*fact_rec(n-1)

number = int(input("Enter a value :"))
res = fact_rec(number)

print("The factorial of {} is {}".format(number,res))
```
